

Hartford Municipal Opportunities Fund

Tickers: A: HHMAX C: HHMCX F: HHMFX I: HHMIX Y: HHMYX

What Happened?

- Global sovereign yields declined sharply amid softer growth signals and heightened geopolitical and trade-policy uncertainty, while most fixed-income sectors delivered negative excess returns as credit spreads widened.
- Municipal bonds, as measured by the Bloomberg Municipal 1-15 Year Blend (1-17) Index, returned 1.02% during the month. The ratio of 10-year AAA general obligations (GOs) to 10-year Treasuries increased from 62.2% to 64.1%, remaining below the long-term historical average of 86% over the last 20 years.¹
- February municipal issuance totaled \$40.3 billion, essentially flat year-over-year and marking the third highest February on record. Supply declined modestly from February 2025 levels (1.1%) but remained elevated as infrastructure funding needs and higher project costs continued to drive borrower activity. Year-to-date issuance through February reached \$74.6 billion, down 10.6% vs. the same period last year.²

Performance Highlights

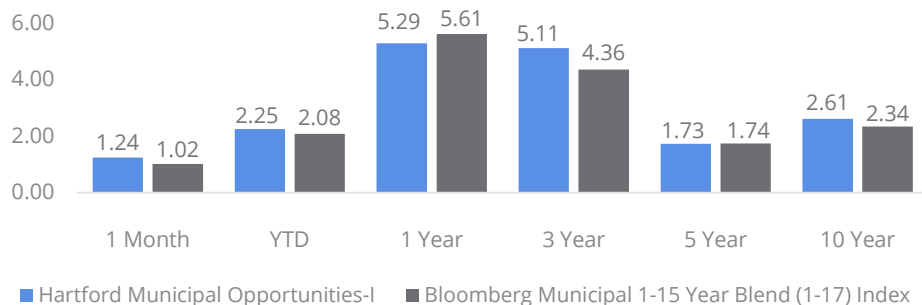

Contributors

- Duration and yield-curve positioning contributed to benchmark-relative returns, as we maintained an overweight to the 20 - and 30- year segments of the curve, where yields declined
- Security selection within investment-grade housing, special tax, and sales-tax sectors added to relative returns

Detractors

- Security selection within investment-grade lease and transportation detracted from relative returns

Month End Performance (%) (I-Share) as of 2/28/26

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com. Please see page 3 for standardized performance. Returns for less than one year are not annualized.

Spreads are the difference in yields between two fixed-income securities with the same maturity but originating from different investment sectors.

Duration is a measure of the sensitivity of an investment's price to nominal interest-rate movement.

Yield curve is a line that plots the yields or interest rates of bonds that have equal credit quality but different maturity dates. The slope of the yield curve predicts the direction of interest rates and the economic expansion or contraction that could result.

Current Insight and Positioning From Wellington Management

- Most states ended FY25 with revenues above forecast. Although they have been declining recently, strong reserves keep us positive overall.
- Many municipal sectors have the ability to raise revenues quickly to address inflationary pressures. The more labor-constrained sectors such as healthcare and state and local governments will be more challenged if inflation persists, but local governments still have exceptional cash reserves, and hospitals are in the best financial position they have been in over the past five years.
- Expect municipals to behave defensively in a downturn given their high quality and strong balance sheets
- Tax-exempts are somewhat attractive at the corporate tax rate vs. corporate bonds, particularly relative to their recent history and at longer maturities
- Valuations are fair to rich across the curve, with the long end presenting the most value.
- Following a record-breaking year of issuance in 2025, we expect this trend to continue and to be met by continued demand. A sharp move higher in rates is likely to lead to outflows and a more challenging market environment.

Credit exposure is the credit ratings for the underlying securities of the Fund as provided by S&P, Moody's, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the median rating is used. If only two agencies assign ratings, the lower rating is used. If only one agency has rated the security, that rating will be used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Characteristics are subject to change. Percentages may be rounded.

Share Class Inception: A, I - 5/31/07; F - 2/28/17; Y - 5/31/18. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/31/07. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge. Performance for periods of less than one year is not annualized.

Benchmark: Bloomberg Municipal 1-15 Year Blend (1-17) Index is a sub-index of the Bloomberg Municipal Bond Index. It is a rules-based market value-weighted index of bonds with maturities of 1 year to 17 years engineered for the tax-exempt bond market. Indices are unmanaged and not available for direct investment.

*Class I-Shares Star Ratings: 3-year 4 stars out of 254 products, 5-year 4 stars out of 232 products, and 10-year 4 stars out of 175 products for the period ended herein. Other share classes may have different ratings. The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Municipal securities may be adversely impacted by state/local, political, economic, or market conditions. Investors may be subject to the federal alternative minimum tax as well as state and local income taxes. Capital gains, if any, are taxable. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds are considered speculative, involve heightened credit risk and greater risk of price volatility, illiquidity, and default than investment grade bonds.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Mutual funds are distributed by Hartford Funds Distributors, LLC (HFD), Member FINRA. Advisory services are provided by Hartford Funds Management Company, LLC (HFMC). Certain funds are sub-advised by Wellington Management Company LLP. HFMC and Wellington Management are SEC registered investment advisers. HFD and HFMC are not affiliated with any sub-adviser.
