| QUVU | Hartford Quality Value ETF | 0.45 | Large Value | An actively managed large-cap value ETF that focuses on investing in high quality, undervalued companies believed to be in out-of-favor industries |
| VMAX | Hartford US Value ETF | 0.29 | Large Value | Designed to maximize exposure to the lowest valuation companies in the US large-cap equity markets without sacrificing other factor exposures |
| HQGO | Hartford US Quality Growth ETF | 0.34 | Large Growth | Designed to provide efficient exposure to the US large-cap growth equity market with an emphasis on quality growth at reasonable valuations |
| HFGO | Hartford Large Cap Growth ETF | 0.59 | Large Growth | An opportunistic growth fund that looks for early signs of accelerating fundamentals |

¹ Expenses are the total annual operating expenses from the Fund's most recent prospectus at the time of publication.. For DYNB, Expenses are from the Fund's most recent prospectus at the time of publication. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 11/30/26 unless the Fund's Board of Trustees approves an earlier termination. Without these arrangements, performance would have been lower. For HEMI, Expenses are from the Fund's most recent prospectus at the time of publication. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 2/28/27 unless the Fund's Board of Trustees approves an earlier termination. Without these arrangements, performance would have been lower.

For financial professionals seeking more information on Hartford Funds and our ETFs, please call our Sales Desk at 800-456-7526 and visit us at hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Investing involves risk, including the possible loss of principal. Security prices of the Funds' underlying holdings will fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The market price of the Funds' shares will fluctuate in response to changes in the Funds' net asset value, intraday value of the Funds' holdings, and the supply and demand for shares. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Investments focused in a country, region, industry or group of industries may increase volatility and risk. • Small cap securities can have greater risks, including liquidity risk, and volatility than large-cap securities. • The Multifactor ETFs are not actively managed but rather attempt to track the performance of an index. The Multifactor ETF returns may diverge from that of the index.

Fixed income security risks include credit, liquidity, call, duration, event and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Municipal securities may be adversely impacted by state/local, political, economic, or market conditions. Investors may be subject to the federal Alternative Minimum Tax as well as state and local income taxes. Capital gains, if any, are taxable. • The fixed income ETFs are actively managed and do not seek to replicate the performance of a specified index.

Diversification does not ensure a profit or protect against a loss.

Fund Objectives: **DYNB** seeks to provide long-term total return. **HCRB** seeks to provide long-term total return. **HTRB** seeks a competitive total return, with income as a secondary objective. **TRPA** seeks to provide capital preservation and current income. **HFSI** seeks to provide current income and long-term total return. **HMOP** seeks to provide current income that is generally exempt from federal income taxes, and long-term total return. **HTAB** seeks total return on an after-tax basis. **HDUS** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of exchange traded U.S. large-cap equity securities. **ROUS** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of exchange traded US equity securities. **HEMI** seeks to generate current income in a tax efficient manner while maintaining the potential for capital appreciation. **ROSC** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of small capitalization exchange traded equity securities. **RODM** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of companies located in major developed markets of Europe, Canada and the Pacific Region. **ROAM** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index based upon the emerging markets of the world. **QUVU** seeks long-term capital appreciation. **HQGO** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of exchange traded US large cap equity securities and is designed to consist of US equities with favorable growth characteristics while maintaining what is considered to be enhanced exposure to quality while also providing reasonable exposure to value and momentum. **VMAX** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of exchange traded us large-cap equity securities and is designed to consist of US equities with favorable value characteristics and relatively lower market valuations. **HFGO** seeks capital appreciation.

ETFs are distributed by ALPS Distributors, Inc. (ALPS).
