Share Class Inception: R3, R4, R5, Y - 10/24/16; SDR - 12/30/14. Share class performance prior to 10/24/16 reflects the performance of the predecessor fund. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 6/25/13. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Performance for periods of less than one year is not annualized.

Benchmark: JP Morgan Emerging Markets Blended Index (JEMB) - Equal Weighted is a blended index that is comprised of 1/3 JP Morgan GBI Emerging Markets Global Diversified Index, 1/3 JP Morgan EMBI Global Diversified Index, and 1/3 JP Morgan CEMBI Broad Diversified Index. The JEMB - Equal Weighted is designed to blend US dollar and local currency denominated sovereign, quasi-sovereign and corporate bonds in equal proportion. Indices are unmanaged and not available for direct investment.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Expenses (%)

	R3	R4	R5	SDR	Y
Gross	1.90	1.60	1.30	1.18	1.29
Net	1.17	0.87	0.57	0.45	0.55

Expenses are from the Fund's most recent prospectus at the time of publication. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 2/28/26 unless the Fund's Board of Directors approves an earlier termination. Without these arrangements, performance would have been lower.

Credit exposure is the credit ratings for the underlying securities of the Fund as provided by S&P, Moody's, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the average rating is used. If only two ratings agencies assign ratings, the average is used. If only one agency has rated the security, that rating will be used. Securities that are not rated by any of the three agencies may be listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments, including foreign government debt, may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, valuation, and counterparty risk. • The Fund's investments may fluctuate in value over a short period of time. • Restricted securities may be more difficult to sell and price than other securities. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability. • Because the Fund is non-diversified, it may invest in a smaller number of issuers, and may be more exposed to risks and volatility than a more broadly diversified fund. • Financially material environmental, social and/or governance (ESG) characteristics are one of several factors that may be considered. The Fund may perform differently from funds that do not integrate ESG into their analysis.

Effective Duration measures the sensitivity of an asset or portfolio's price to nominal interest rate movement. **30-Day SEC Yield** reflects the hypothetical net current income earned, after the deduction of a fund's expenses, during a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the period. Actual income distributions will usually differ. **Unsubsidized 30-Day SEC Yield** is the Fund's 30-Day SEC yield without the impact of fee/expense waivers.
